Languages: Spanish (Native), English (C1 - TOEFL) | **Work Authorization:** Colombian & Venezuelan Citizen

Summary

Results-oriented Data Analyst and Engineer with 4+ years of experience designing scalable data pipelines, cloud architectures (AWS), and AI-driven solutions. Proven expertise in bridging business needs and technical deployment, specializing in RAG systems, ETL pipeline automation (Python, SQL, R), and cloud data warehouse migration.

Technical Skills

Languages & Core: Python, SQL, R, Bash, PowerShell, Git

Data Engineering & Cloud: AWS (S3, EC2, Glue), Terraform, Docker, Airflow, REST APIs, PostgreSQL

Data Science & AI: RAG Architectures, OpenAI API, Scikit-learn, Pandas, NumPy

Analytics & Visualization: Tableau, Power BI, Looker Studio, R Shiny

Experience

MEG *CCS, Venezuela*

Data Analyst for AI Solutions *Jan 2024 – Present*

- **Architected RAG Systems:** Designed end-to-end *RAG pipelines* using *Python*, *OpenAI embedding* models, and *vector stores*, enabling natural language queries across 100+ unstructured knowledge bases to accelerate executive decision-making.
- **Automated Text-Processing Workflows:** Built scalable *LLM pipelines* that reduced document processing times and operational costs by 10x, establishing a standardized product offering for clients.
- **Standardized AI Deployments:** Engineered a private *Python package* incorporating *unit testing* to streamline and unify AI solution deployment across the team.
- **Managed Production Infrastructure:** Monitored and maintained critical *AI applications* deployed on *DigitalOcean* infrastructure, ensuring high availability and system uptime.

Freelance Consultant *Remote*

Software and Data Solutions *Aug 2025 – Sep 2025*

- **Architected AWS Cloud Data Model**: Designed a logical model for a *data warehouse* on *AWS* for a major bank, replacing legacy Excel workflows and establishing audit-ready metrics for C-suite reporting.
- **Audited Banking IT Infrastructure:** Mapped cross-functional workflows and data wrangling bottlenecks across departments to define the technical roadmap for *cloud migration*.
- **Engineered AI Chatbot Engine:** Built a hybrid intent-parsing engine in *Python* for a high-end restaurant, integrating rule-based workflows with LLM intent extraction.
- **Refactored Codebase:** Implemented a comprehensive *unittest* suite in *Python*, improving system stability and preventing regression errors prior to client rollout.

MEG *CCS, Venezuela*

Data Analyst *Apr 2022 – Jan 2024*

- **Automated Multilateral Legal Audit:** Developed an automated text-comparison tool in *Python (difflib/pywin32)* to detect legal discrepancies in compliance documentation across 100+ countries.
- **Built Interactive Dashboards:** Designed and deployed production-grade *Tableau* dashboards and *R Shiny* web applications to analyze client conversion rates and engagement KPIs.
- **Streamlined ETL Operations:** Authored *Python* and *R scripts* to automate ingestion, cleaning, and geospatial enrichment via *REST APIs* for large-scale survey datasets.

YUMMY *CCS, Venezuela*

Jr. Operations Analyst *Nov 2021 – Mar 2022*

- **Optimized Operational Data Workflows:** Programmed *Python* and *JavaScript* scripts to automate data extraction, reducing manual processing time from 3 hours to seconds.
- **Deployed Operational KPI Dashboards:** Built interactive *Looker Studio* dashboards tracking fleet logistics and operational KPIs, directly informing business decisions.

Education

UNIMET *CCS, Venezuela*

B.S. in Mechanical Engineering (GPA 15.58 / 20) *2021*

Certifications & Coursework

Certifications:

- *AWS Certified Solutions Architect (Associate)* — AWS (Oct 2026)
- *Data Engineering Professional Certificate* — Coursera (Sep 2025)
- *IBM Data Science Professional Certificate* — Coursera (Aug 2021)
- *Data Analyst Associate* — DataCamp

Continuing Education — MITx MicroMasters Coursework:

- *Machine Learning with Python:* Supervised/Unsupervised models, Neural Networks, Reinforcement Learning
- *Probability – The Science of Uncertainty and Data:* Bayesian inference, Markov Chains, Stochastic processes
- *Fundamentals of Statistics:* Hypothesis testing, Parameter estimation, Generalized Linear Models
